

MD. SAKIB HOSSAIN ALIF

Frontend Developer | React.js | Next.js | TypeScript

+880 177 577 8144 • alifsakib@gmail.com • Dhaka, Bangladesh • LinkedIn • GitHub • Portfolio

SUMMARY

Frontend Developer with 3+ years of experience building scalable web applications, conversational platforms, and document management systems. Proficient in Next.js, React, and TypeScript with expertise in API integrations (GraphQL, REST, Meta) and real-time WebSockets.

CORE COMPETENCIES

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, Material-UI
Backend/API: Node.js, Express.js, GraphQL, Apollo Client, REST APIs, WebSockets (Socket.IO)
Tools: Git, Docker, React Flow, React Konva, dnd-kit, React Query, Vite

PROFESSIONAL EXPERIENCE

The Red IT June 2025 – Present
Frontend Developer

- Developed interactive user interface features and graph visual flows for a multi-channel messaging platform.
- Connected and managed data communication using GraphQL and REST APIs.
- Built rich text editing experiences using React Slate.
- Wrote automated tests with Playwright to catch bugs early and keep the app stable.
- Used Claude Code and custom Claude skills to speed up development and handle code refactoring.
- Resolved UI issues, fixed daily bugs, and wrote clear documentation for the team.

FairPattern June 2024 – June 2025
Frontend Developer

- Built a React Konva document editor and split-screen viewer to unify user workflows.
- Designed a TypeScript-based dynamic form and query builder for non-technical users.
- Migrated app state to Redux Toolkit and React Query for streamlined data handling.

Sundarban Courier Service (Pvt.) Ltd. November 2023 – June 2024
Frontend Developer

- Implemented real-time parcel tracking using WebSockets and Apollo GraphQL.
- Developed a Next.js interactive dashboard featuring bulk parcel uploads.
- Collaborated on API contracts to synchronize booking and tracking data.

Deshifarmer February 2023 – November 2023
Frontend Developer

- Built reusable React.js and Next.js components for admin and e-commerce workflows.
- Implemented map and chart visualizations to display agricultural data trends.
- Optimized state management and reduced re-renders using Redux and custom hooks.

PROJECTS

Pulse Analytics | React 19, TypeScript, Vite, Tailwind CSS, Recharts
A real-time SaaS intelligence dashboard to help teams track live metrics, user retention, and financial growth in a unified command center. Developed interactive data visualizations and responsive layouts, featuring custom charts, conversion funnels, and live growth simulations.

Gift Genie | React.js, Google Gemini API, TypeScript

Semantic AI gift recommendation with Google Gemini; multi-tiered budget matching (BDT ৳ / USD \$); direct WhatsApp hamper order engine with affiliate routing.

EDUCATION

Bachelor of Science in Computer Science

Bangladesh University of Business & Technology (BUBT) • 2017 – 2021

Graduated with First Class Honors
