Frontend Developer | React.js | Next.js | TypeScript

Frontend Developer with 3+ years of experience building scalable web applications, conversational platforms, and document management systems. Proficient in Next.js, React, and TypeScript with expertise in API integrations (GraphQL, REST, Meta) and real-time WebSockets

Professional Experience

Woztell

July 2025 - Present

Frontend Developer

- Developed scalable features for a multi-channel conversational platform (WhatsApp, Messenger) using Next.js and Meta APIs.
- Designed dynamic graph visual flows with React Flow and GraphQL, enhancing UI/UX and resolving critical bugs, reducing UI rendering latency by **20%**

FairPattern

June 2024 – June 2025

Frontend Developer

- Engineered core features for DigiQore (Document Management System), including custom document editors, dynamic form builders, split-screen views, and custom query builders.
- Optimized state management using Redux Toolkit, React Query, and TypeScript for complex async workflows.

Sundarban Courier Service (Pvt.) Ltd.

November 2023 – June 2024

Front-end Developer

- Built a delivery booking platform with real-time tracking via WebSockets (Socket.IO) and Apollo GraphQL

Deshifarmer Ltd.

February 2023 – November 2023

React Developer

- Developed admin panels and agricultural e-commerce workflows using React and data visualization libraries.

Projects

Document Editor | React Konva, JavaScript, React

- Developed an interactive canvas editor using **React Konva** for dynamic element placement, layout manipulation, and smooth graphics rendering.

Form Builder | dnd-kit, TypeScript, React

- Built a custom drag-and-drop form builder using **@dnd-kit**, featuring flexible layout creation and real-time schema configuration.

Education

Bangladesh University of Business and Technology | B.Sc. in Computer Science

Academic Project: Developed an Air-Ticket booking system using HTML, CSS, JavaScript, and MySQL. Research on Popularity Analysis of US presidential Election candidates based on the Twitter dataset. Thesis on sentiment analysis using NLP

Core Competencies

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, Material-UI

Backend & APIs: Node.js, Express.js, GraphQL, Apollo Client, REST APIs, WebSockets ([Socket.IO](#))

Tools & DevOps: Git, Docker.

Libraries: React Flow, React Konva
